SharedObjectDelete

The transaction accepted a shared object as input, but it was deleted before the transaction executed.

```
type SharedObjectDelete {
  address: SuiAddress!
  version: UInt53!
  mutable: Boolean!
}
```

Fields

`SharedObjectDelete.address` `SuiAddress!` non-null scalar

ID of the shared object.

`SharedObjectDelete.version` `UInt53!` non-null scalar

The version of the shared object that was assigned to this transaction during by consensus, during sequencing.

`SharedObjectDelete.mutable` `Boolean!` non-null scalar

Whether this transaction intended to use this shared object mutably or not. See `SharedInput.mutable` for further details.

Implemented By

`UnchangedSharedObject` union
