DryRunResult

No description

```
type DryRunResult {
  error: String
  results: [DryRunEffect!]
  transaction: TransactionBlock
}
```

Fields

DryRunResult.error.String scalar

The error that occurred during dry run execution, if any.

DryRunResult.results.[DryRunEffect!] list object

The intermediate results for each command of the dry run execution, including contents of mutated references and return values.

DryRunResult.transaction.TransactionBlock object

The transaction block representing the dry run execution.

Returned By

dryRunTransactionBlock query
