

MoveAbility

Abilities are keywords in Sui Move that define how types behave at the compiler level.

```
enum MoveAbility {  
  COPY  
  DROP  
  KEY  
  STORE  
}
```

Values

[MoveAbility.COPY](#)

Enables values to be copied.

[MoveAbility.DROP](#)

Enables values to be popped/dropped.

[MoveAbility.KEY](#)

Enables values to be held directly in global storage.

[MoveAbility.STORE](#)

Enables values to be held inside a struct in global storage.
