

TransferObjectsTransaction

Transfers `inputs` to `address`. All inputs must have the `store` ability (allows public transfer) and must not be previously immutable or shared.

```
type TransferObjectsTransaction {  
  inputs: [TransactionArgument!]!  
  address: TransactionArgument!  
}
```

Fields

`TransferObjectsTransaction.inputs` • `[TransactionArgument!]!` **non-null** **union**

The objects to transfer.

`TransferObjectsTransaction.address` • `TransactionArgument!` **non-null** **union**

The address to transfer to.

Implemented By

`ProgrammableTransaction` **union**
