

AddressTransactionBlockRelationship

The possible relationship types for a transaction block: sent, or received.

```
enum AddressTransactionBlockRelationship {  
  SENT  
  AFFECTED  
}
```

Values

[AddressTransactionBlockRelationship.SENT](#)

Transactions this address has sent.

[AddressTransactionBlockRelationship.AFFECTED](#)

Transactions that this address was involved in, either as the sender, sponsor, or as the owner of some object that was created, modified or transferred.
