

# MoveEnumVariant

No description

```
type MoveEnumVariant {
  name: String!
  fields: [MoveField!]
}
```

## Fields

`MoveEnumVariant.name` • `String!` **non-null** **scalar**

The name of the variant

`MoveEnumVariant.fields` • `[MoveField!]` **list** **object**

The names and types of the variant's fields. Field types reference type parameters, by their index in the defining enum's `typeParameters` list.

## Member Of

`MoveEnum` **object**
