

SharedObjectRead

The transaction accepted a shared object as input, but only to read it.

```
type SharedObjectRead {  
  address: SuiAddress!  
  version: UInt53!  
  digest: String!  
  object: Object  
}
```

Fields

[SharedObjectRead.address](#) • [SuiAddress!](#) **non-null** **scalar**

ID of the object being read.

[SharedObjectRead.version](#) • [UInt53!](#) **non-null** **scalar**

Version of the object being read.

[SharedObjectRead.digest](#) • [String!](#) **non-null** **scalar**

32-byte hash that identifies the object's contents at this version, encoded as a Base58 string.

[SharedObjectRead.object](#) • [Object](#) **object**

The object at this version. May not be available due to pruning.

Implemented By

[UnchangedSharedObject](#) **union**
