

ConsensusCommitPrologueTransaction

System transaction that runs at the beginning of a checkpoint, and is responsible for setting the current value of the clock, based on the timestamp from consensus.

```
type ConsensusCommitPrologueTransaction {  
  epoch: Epoch  
  round: UInt53!  
  commitTimestamp: DateTime!  
  consensusCommitDigest: String  
}
```

Fields

`ConsensusCommitPrologueTransaction.epoch` • Epoch **object**

Epoch of the commit prologue transaction.

`ConsensusCommitPrologueTransaction.round` • UInt53!

non-null **scalar**

Consensus round of the commit.

`ConsensusCommitPrologueTransaction.commitTimestamp` • DateTime!
non-null **scalar**

Unix timestamp from consensus.

`ConsensusCommitPrologueTransaction.consensusCommitDigest` • String **scalar**

Digest of consensus output, encoded as a Base58 string (only available from V2 of the transaction).

Implemented By

`TransactionBlockKind` **union**
