

Feature

Groups of features served by the RPC service. The GraphQL Service can be configured to enable or disable these features.

```
enum Feature {  
  ANALYTICS  
  COINS  
  DYNAMIC_FIELDS  
  NAME_SERVICE  
  SUBSCRIPTIONS  
  SYSTEM_STATE  
  MOVE_REGISTRY  
}
```

Values

[Feature.ANALYTICS](#)

Statistics about how the network was running (TPS, top packages, APY, etc)

[Feature.COINS](#)

Coin metadata, per-address coin and balance information.

[Feature.DYNAMIC_FIELDS](#)

Querying an object's dynamic fields.

[Feature.NAME_SERVICE](#)

SuiNS name and reverse name look-up.

[Feature.SUBSCRIPTIONS](#)

Transaction and Event subscriptions.

[Feature.SYSTEM_STATE](#)

Aspects that affect the running of the system that are managed by the validators either directly, or through system transactions.

Feature.MOVE_REGISTRY

Named packages service (utilizing dotmove package registry).
