DynamicFieldName

No description

```
input DynamicFieldName {
  type: String!
  bcs: Base64!
}
```

Fields

`DynamicFieldName.type`.`String!` **non-null** scalar

The string type of the DynamicField's 'name' field. A string representation of a Move primitive like 'u64', or a struct type like '0x2::kiosk::Listing'

`DynamicFieldName.bcs`.`Base64!` **non-null** scalar

The Base64 encoded bcs serialization of the DynamicField's 'name' field.
