TransactionMetadata

The optional extra data a user can provide to a transaction dry run. `sender` defaults to `0x0`. If `gasObjects` `is not present, or is an empty list, it is substituted with a mock Coin object,` `gasPrice` `defaults to the reference gas price,` `gasBudget` `defaults to the max gas budget and` `gasSponsor` ` defaults to the sender.

```
input TransactionMetadata {
  sender: SuiAddress
  gasPrice: UInt53
  gasObjects: [ObjectRef!]
  gasBudget: UInt53
  gasSponsor: SuiAddress
}
```

Fields

`TransactionMetadata.`**`sender`**`.`SuiAddress `scalar`

`TransactionMetadata.`**`gasPrice`**`.`UInt53 `scalar`

`TransactionMetadata.`**`gasObjects`**`.`[ObjectRef!] `list` `input`

`TransactionMetadata.`**`gasBudget`**`.`UInt53 `scalar`

`TransactionMetadata.`**`gasSponsor`**`.`SuiAddress `scalar`

Member Of

`dryRunTransactionBlock` `query`
