ZkLoginVerifyResult

The result of the zkLogin signature verification.

```
type ZkLoginVerifyResult {
  success: Boolean!
  errors: [String!]!
}
```

Fields

`ZkLoginVerifyResult.success.Boolean!` **non-null** **scalar**

The boolean result of the verification. If true, errors should be empty.

`ZkLoginVerifyResult.errors.[String!]!` **non-null** **scalar**

The errors field captures any verification error

Returned By

`verifyZkloginSignature` **query**
