IMoveDatatype

Interface implemented by all GraphQL types that represent a Move datatype (either structs or enums). This interface is used to provide a way to access fields that are shared by both structs and enums, e.g., the module that the datatype belongs to, the name of the datatype, type parameters etc.

```
interface IMoveDatatype {
  module: MoveModule!
  name: String!
  abilities: [MoveAbility!]
  typeParameters: [MoveStructTypeParameter!]
}
```

Fields

IMoveDatatype.**module**.MoveModule! **non-null** **object**

The module that the datatype belongs to.

IMoveDatatype.**name**.String! **non-null** **scalar**

The name of the datatype.

IMoveDatatype.**abilities**.[MoveAbility!] **list** **enum**

The abilities of the datatype.

IMoveDatatype.**typeParameters**.[MoveStructTypeParameter!] **list** **object**

The type parameters of the datatype.

Implemented By

MoveDatatype **object** MoveEnum **object** MoveStruct **object**
